ABSTRACT

This document aims at giving the main sections that your summary should have. Indeed, you can have more sections if you feel you require more sections.

1. INTRODUCTION

Here, you have to give the context of the HelloWorld paper, give the motivation (examples are welcome), state the problem HelloWorld addresses, give the overall idea of the paper, and make clear the contributions of the HelloWorld paper.

2. RELATED WORK

You have to differentiate HelloWorld with related work. Contrasting HelloWorld with related work that is not cited in the original paper is highly appreciated. Doing so you increase your chances to get a higher grade for your summary.

3. SOLUTION

Explain the solution proposed by authors of the HelloWorld paper. Use examples wherever you feel it is important, because this would better pass the idea to the reader. Remember that concrete examples are typically the best way to explain ideas. Consider to do so because the grade of your summary strongly depends on the clarity of your summary.

4. RESULTS

Here, you should present the most important results from the HelloWorld paper. Giving the reasons that clearly explain the results help the reader to better evaluate the efficiency. Thus, do not forget to clearly explain all the results you present here.

5. DISCUSSION

Now, it is time you include this paper with your own words. Especially, you should not only give the strong points of HelloWorld, but also the weak points of the paper. In addition, if you have the feeling that this paper has a large overlap with existing techniques, it is here that you should state it.
